Profile

A passionate frontend developer skilled in HTML, CSS, JavaScript, and React.js, with a flair for crafting dynamic and user-friendly interfaces. I've worked on creative web projects like the 'Gradient Makker' website and a unique blood group compatibility visualization tool. With experience in integrating MongoDB for efficient data handling, I'm always exploring advanced JavaScript concepts like design patterns and AJAX to create seamless, responsive web experiences. Driven by a love for design and innovation, I strive to deliver impactful and meaningful web solutions.

Education

Bachelors of Science in Software Engineering, University Of Karachi 2022 Feb – present

Intermediate (Pre-Engineering), Govt. Islamia Science College Karachi 2018 Sep – 2020 Oct

Professional Experience

Frontend Web Developer (Remote), petalnex Pvt. Ltd. 2024 Oct – present
Currently interning at Patelnex Company, where I developed frontend websites using React.js. I am now expanding my skill set by learning the MERN stack, focusing on building full-stack web applications. Passionate about designing intuitive user experiences and continuously growing as a developer.

Frontend Web Developer (Remote Intern), CodeClause 2024 Jan – 2024 Feb

- Designed and built responsive websites using HTML, CSS, and JavaScript
- Worked closely with design teams to implement intuitive and engaging user interfaces.
- Integrated APIs to display dynamic content and enhance user interaction.
- Conducted thorough code reviews and improved codebase efficiency based on feedback.
- Gained practical experience with contemporary web development tools and practices.

Frontend Web Developer (Remote Internship), Code Alpha 2023 Oct – 2023 Dec

Completed an internship at CodeAlpha, where I developed innovative projects, including a face detector and a background remover.

Skills

- HTML | CSS (including SCSS and TailwindCSS) |
- Bootstrap | JavaScript (ES6 and beyond) |
- MySQL | MongoDB | GitHub |
- React.js | Framer Motion | MaterialUI |

Projects

Family Tree Application

2024 Feb – 2024 May

As part of a team project, we developed an interactive Family Tree application designed to visualize and manage family relationships. I contributed as the frontend developer, using modern web technologies such as HTML, and CSS (SCSS and Tailwindcss), Bootstrap, Javascript, React.js, etc. My responsibilities included creating a responsive and intuitive user interface that allows users to easily add, view, and navigate through family members and their connections.

Social Media App (like facebook)

2024 Jun – 2024 Sep

Developed the frontend of a social media application similar to Facebook using React.js and SCSS, focusing on creating a responsive and user-friendly interface. Implemented features such as news feeds, user profiles, and dynamic content rendering, leveraging a scalable component-based architecture to ensure maintainability and reusability. Applied modern frontend development best practices to enhance performance and accessibility.

ArtBay Gallery

2024 Mar

Developed a dynamic and visually appealing online art gallery using HTML, CSS, and JavaScript. The website fetches and displays images from an API, showcasing a curated selection of artwork from around the world. Designed to be fully responsive, the site provides an engaging user experience across all devices.
